

ABOUT US

We are a trusted, family-run business based in Wieruszów, Poland, with a legacy dating back to 1994. Since our early days, we have specialized in floor screeding. In 2010, our founder, Janusz Clapa, recognized the physically demanding and health-risking nature of manual screeding. Motivated by his deep hands-on experience and a desire to improve worker conditions, he developed the pioneering Floor Master robot.

Our mission is clear: to protect workers and elevate the quality of screeding by replacing exhausting manual labor with intelligent automation.
